After you have had all the 'expert advice', call us for all the facts! For all your water solutions.  
We know and understand water!

Global Water Solutions Pty.Ltd. specialise in desal water treatment and purification. Our focus areas are the following: - spear water treatment - bore water treatment - sea water desalination up to 2 000 000 Lt / day - commercial and industrial water treatment. We offer a complete range of our own products, this means that you are dealing with the manufacturer and in turn receiving the following benefits: - the most competitive pricing - thorough product knowledge - sound advice - no waiting for parts from overseas - immediate and decisive warranty response.

Global Water Solutions Pty.Ltd. guarantees both, the life of the products and performance of the products.

So, if a product does not achieve what we design it to do, we offer a 100% satisfaction policy to all clients. As well as - 24 hour communication support for remote area / mine / island and offshore installations. We provide 24 hour return, bore water testing through our in house lab, this enables us to quickly respond to your request and also enables us to offer ongoing quality monitoring and support for our clients, including domestic, residential and commercial. Our services extend to remote areas of Queensland, Australia and the Pacific Islands, and also offshore. Freight and shipping arrangements available by request.

We have been testing artesian bore water, spear water, filtration and desalination processes for many years.
