

Domestic Water Filtration

Domestic Water Filtration Products - Enjoy the benefits of clean domestic or house-hold water. Consume, clean, chlorine free water, from any tap in the house.

Chlorine free showers and clean quality water throughout, keeping your family safe and healthy. Chlorine is universally used to chemically disinfect water. It kills germs and bacteria and other micro-organisms. Chlorine readily passes through cell walls and can attach itself to fatty acids within the body, disrupting normal life sustaining functions. It may be necessary to disinfect our water, using chlorine, but now we are able to avoid exposure by simply removing it, once it has done its job. Keep your family safe with domestic water filtration solutions from Global Water

CLEAN FILTERED WATER FROM YOUR BORE, SPEAR, WATER TANK
SUPPLY, OR MAKE YOUR OWN USABLE WATER, FROM THE SEA...

NO RESTRICTIONS - NO STAINING - NO ODOUR - NO HEALTH RISK..

Phone NOW to discuss your domestic WATER requirements.

Home and Garden Water Wise Scheme
Information for Queensland residents

The Home and Garden Water Wise Rebate Schemes are Queensland Government incentive packages designed to help Queenslanders make their homes and gardens more water efficient—every drop is precious! Please note that new changes to the Home and Garden Water Wise Rebate Schemes allow for the payment of up to \$1500 for the purchase and installation of an internally plumbed new rainwater tank to Queensland residents not on reticulated/mains water systems.

Changes to the Queensland Development Code relating to dual flush toilet suites and shower-heads, effective from 1 January 2008.

From 1 January 2008, dual-flush toilet suites and/or shower-heads are now, not eligible for a rebate if retrofitted as part of a renovation. Changes to the Queensland Development Code on 1 January 2008 require that retrofitting of dual-flush toilet suites and three star shower-heads are a mandatory requirement, where renovations are undertaken in residential properties.
