

Global Water Solutions Company Profile

Introduction

Global Water Solutions is an Australian owned and operated water treatment business that focuses on the design, manufacture, installation, commissioning and servicing of water and wastewater treatment equipment. We supply our services to regional utilities, resorts, numerous industries and remote or developing communities in Australia and the South Pacific Region.

Our Industry Capability

With our total commitment to client support and service we have developed a unique Product Management System (PMS) that is a comprehensive package designed to address total project control including product support, operator training, product service and performance and monitoring of all plant and equipment supplied. We support this package with a full comprehensive maintenance capability and a team of qualified, experienced technicians.

Global Water Solutions specialises in the design and supply of innovatively engineered products using the best practice standards for the supply and assembly of quality componentry.

We provide factory proven skid mounted equipment ready to operate when it arrives on site. Our commitment to client satisfaction is our first and only consideration.

Global Water Solutions is proud to be Australia's premium supplier of Water Purification, Desalination and Filtration Systems. Our range of products are second to none.

In Partnership with our sister Company, Pure Water Systems (Aust.) Pty Ltd who service over 100,000 residential , commercial and industrial customers throughout Australia. Our experience allows us to offer the very best products and services available.

Occupational Health and Safety Policy

The Management of Global Water Solutions, has a very strong commitment to the provision of a healthy work environment, safe working practices and responsible environmental preservation. We recognise environmental preservation, as the most important aspect of our operation. All staff and sub-contractors are trained in these safe working methods and environmental preservation. Contractors are also encouraged to be pro-active and submit suggestions to better manage our methods to further improve our operation. This policy is a statement of commitment.

Environmental Objectives

Comply with and exceed the level of environmental performance required by the Environmental Protection Agency (EPA) A copy of this policy is available from the official EPA website.

Establish and maintain environmentally responsible waste management and waste disposal practices.

Eliminate harm to flora and fauna, identify sensitive area's or heritage sites and instigate appropriate protective measures, and on completion, restore work sites to original condition.

Store all materials in a manner that reduces the risk of potential release to the atmosphere, soil or water sources

Establish procedures for the safe containment of hazardous materials and for appropriate action in the event of spillage or accidental contamination.

Reduce the potential for environmental harm in emergency situations, by responding effectively and efficiently to emergencies using trained personnel and sub-contracting staff, as well as establishing emergency procedures.

Ongoing reviews of work practices and equipment to minimise energy use and reducing unnecessary waste.

Ensure staff and sub-contractors comply with all relevant requirements of our Environmental policy.

Global Water Solutions supplies all relevant information as required, this allows us to provide our clients and the general

public, with peace of mind and assurance during the process of any work carried out by our company or parties employed by the company.

Our commitment to our clients and the best working practices, is a company policy, and we strive to deliver the best possible outcomes for all work carried out by our company.
